

Nicolas REMISE

Web Designer/Web Developer

www.nicolasremise.fr

ABOUT ME

Being curious by nature, I like to understand the world and its mechanisms.

Thus, I followed a versatile path that allows me to have a global vision of today's computer science.

Lately, I flourish in different Javascript technologies like AngularJs or Node.Js.

IN THE FUTURE

In the near future, I would like to specialize in Javascript Web technologies, to be able to lead projects later on these technologies.

In addition, I would like to pass on the knowledge I have acquired to those who wish it.
